0.1 Abstract

This cat's eyes are bigger than its wallet.

Extra on cute. Extra-extra on adventure. Little on fluff. Extra-little on long.

Big Eyes is all about fast growth as time is short, and the 819 Casino is about to open! So Big Eyes Infinity will be a flash presale with only 4 stages and one month per stage.

So, here's the plan:

Win the crypto meme popularity contest!

Go big on media, big on influencers and big on cuteness. Become the most talked about meme coin ecosystem in the cosmos.

Win the innovation challenge!

Develop develop develop. Create more games, more token launches, more stunts and partnerships. Create a wealth of community power and utility authority. Big Eyes Infinity is just the beginning of a whole cat and caboodle of cute currencies and utility.

Win with accountability and transparency!

Big Eyes is ready to do better. Complete transparency from the start; presale timeframe, token airdrop, 1:1 token purchases matched in 819 Casino accounts. Inspire greatness with greatness.

Win with integration!

Integrate \$BIGINF tokens into the 819 Casino to create a BIG demand and a SMALL supply. Build the Big Eyes legacy.

Wear the stare

Big Eyes Infinity merch is a must both digital and physical, to expand the Big Eyes Token and fundraise for the project.

Unconfuse Defi

Defi's infancy makes it inaccessible to 99% of the world's population, with only 1% having made it, and everyone has had an oh f**k moment along the way. Big Eyes Swap, the back-end systems, tutorials and how-tos will simplify as much of the process as possible.

Evidence-based hype

A lot of cryptos are all hype and no trousers. Cats want to avoid the lag time; they want to see evidence-based hype – say it, do it. Small paw prints lead to giant leaps. The first action will be the launch of the Beta 819 Casino on the 29th of August, 2023. And then, shortly after, the full version will go live!

0.2 Values

Cats are **active** – they don't do anything without a reason, they don't waste energy, and they don't mess about when it comes to action, many a small bird will testify to that. They do exactly what's expected of them.

Cats are **playful** – they want to move beyond the function to be amused, to be involved and included in what's going on.

Cats are **hard to kill** – 9 lives make cats unstoppable. If it can be made better - make it, doesn't exist - create it, if it hasn't been thought of - dream it.

Cats are **sociable** – the decentralisation of finance and advancement of blockchain won't happen alone, and it won't happen in secret. It's about sharing, communicating and being open about what's happening. That's how trust is built. If you want to go fast, go alone. If you want to go far, go as a pride.

Risks

Below is a non-exhaustive list of the primary risk factors that the Company considers to be significant in relation to the token's trading and/or use. These risk considerations should be taken into consideration alongside all other information provided in the Whitepaper, and participants are recommended to check with their professional advisers (including their financial, accounting, legal, tax, or technical advisers or experts).

The risk of losing access to BIGINF Tokens due to the loss of private key(s), a custodial error, or a participation error is as follows:

A wallet is required for the acquisition, storage, and disposal of BIGINF Tokens. The participant acknowledges that he is responsible for establishing the Wallet with a third-party provider to retain BIGINF Tokens and for taking acceptable security measures to protect the wallet. As a result, if the requisite private key(s) associated with the Wallet holding BIGINF Tokens are lost, the BIGINF Tokens and any other cryptocurrencies and/or tokens will be lost as well. Additionally, any third party that has access to such private key(s), including through the Participant's Wallet's login credentials, may be able to misappropriate the Participant's BIGINF Token. Any errors or malfunctions caused by or relating to the Wallet used by the Participant to receive and hold BIGINF Tokens, including the Participant's own failure to properly maintain or use such Wallet, or caused by the Participant's choice of third-party provider for the Wallet, may also result in the loss of BIGINF Tokens.

Hacking risk and security flaws:

Denial of service attacks, Sybil attacks, spoofing, smurfing, virus attacks and any other similar events that could have an influence on BIGINF Tokens and the services the Company may offer from time to time may be attempted by hackers or groups of hackers.

The risk of security flaw in the Smart Contract, the Website, or the source code of the BIGINF Tokens, or in any associated software and/or infrastructure:

There is a possibility that the Smart Contract, the Website, or the BIGINF Tokens may have inadvertent flaws or vulnerabilities in the source code, preventing users from using or losing BIGINF Tokens. Updates and modifications may have unwanted or unforeseen consequences for BIGINF Tokens.

Risk of not listing or low/no liquidity:

Exchanges may be subject to unclear governmental control, and the Company makes no representations or warranties about exchange service providers. Users, including the participant, may be subject to fraud and failure in connection with those exchanges. There is no guarantee that an active secondary market for BIGINF Tokens will develop or continue to develop. Risk of uninsured losses:

Unlike bank accounts or accounts with financial organisations, BIGINF Tokens are not covered unless the participant buys private insurance particularly for that purpose. There is no public insurer for the loss of BIGINF Tokens.

Internet transmission risks:

There are threats connected with the use of BIGINF Tokens, including the failure of hardware, software, and Internet connections, as well as other technologies on which BIGINF Tokens rely. These failures may cause communication breakdowns, mistakes, distortions, or delays when utilising BIGINF Tokens or the Website.

Risk of price fluctuation:

The quotation of the BIGINF Token can fluctuate, presenting a challenge to model and estimate the future market behaviour even for seasoned cryptocurrency traders. Native cryptocurrencies associated with the internal working of the networks to which the BIGINF Token is deployed are also subject to fluctuations that directly and indirectly could impact the token's value in the market. The Participant must comprehensively acknowledge the price fluctuation risks of the cryptocurrency market and that still cryptocurrencies are traditionally subject to these significant price fluctuations that are beyond the control of the Company and driven mostly by exterior or market forces. The Participant also recognises their BIGINF Token value can go down as well as up, and they could lose some or all of their investment.

Other risks:

The Participant acknowledges and accepts the inherent risks connected with BIGINF Tokens, including, but not limited to, risks associated with money laundering, fraud, exploitation for criminal purposes and any other unanticipated dangers. If any of the risks described in the terms are unacceptable to the Participant and the Participant is unable to comprehend them, the Participant should refrain from acquiring, holding, or using BIGINF Tokens. [MDG3] BY AGREEING TO THESE TERMS AND CONDITIONS AND PARTICIPATING IN THE BIG EYES PRESALE, YOU ARE WAIVING YOUR RIGHTS. YOU AGREE TO HAVE NO RECOURSE, CLAIM, ACTION, JUDGMENT, OR REMEDY AGAINST BIG EYES.
